Mumbai, Maharashtra, India

EDUCATION DETAILS				
Qualification	Institute	Board / University	Year	% / CGPA
B.Tech CSE (AI/ML)	Amity University Mumbai	Amity University Mumbai	2027	8.22
XII	Army Public School Kaluchak	CBSE	2022	83.2%
X	Army Public School Kaluchak	CBSE	2020	94.6%

CERTIFICATIONS
AI Engineer Agentic Track: The Complete Agent & MCP Course
AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents
LLMOps and AIOps Bootcamp
Beginner to Advanced MLOps on GCP (CI/CD, Jenkins, Kubernetes)
Machine Learning A-Z [2026]: ML, DL, AI with AWS, Python & R
Python A-Z™: Python For Data Science With Real Exercises!
AWS Academy Cloud Developing

WORK EXPERIENCE
Artificial Intelligence (AI) Intern Reducate.ai
August 2026 - Present

PROJECTS
Autonomous AI Coworker - Built an autonomous AI assistant capable of completing user tasks using web browsing, web search, Wikipedia, and filesystem tools. - Integrated Model Context Protocol (MCP) with Playwright and Filesystem servers, enabling the agent to interact with web pages and local files through dynamically loaded tools.
Career Digital Twin Agentic AI Application - Built an AI-powered digital twin chatbot using the OpenAI Agents SDK integrated with Google Gemini LLM to answer visitor queries regarding background, skills, and career history. Grounded responses by parsing a LinkedIn PDF profile with PyPDF and injecting a career summary into the system prompt. Implemented custom function-calling tools to capture visitor contact details for follow-up and log unanswered questions, with real-time alerts via the Pushover API. - Built an interactive chat interface with Gradio, and deployed the application on Render.
Multi-Agent AI Application LLMOps Project - Built a Multi-Agent AI Application using LangGraph and LangChain, leveraging Groq LLMs for response generation and integrated Tavily for real-time web search. FastAPI for backend APIs, and Streamlit for an interactive UI. - Implemented code quality and security analysis using SonarQube and containerized the application using Docker. - Automated CI/CD with Jenkins, using GitHub as SCM, pushing Docker images to AWS ECR, and deploying the application on AWS ECS Fargate.
Hotel Reservation Cancellation Prediction End-to-End MLOps Project <i>Python • Scikit-learn • MLflow • DVC • Flask • Docker • Jenkins • Google Cloud Run • Google Container Registry</i>

TECHNICAL SKILLS
Programming Languages: C/C++ (Data Structures and Algorithms), Python, Java, SQL, HTML, CSS, JavaScript
AI: LangChain, OpenAI Agents SDK, Google ADK, Agentic AI, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), Chroma, LangSmith, Hugging Face Libraries, Strands, Pydantic AI, Microsoft Agent Framework, Agno
Machine Learning: Deep Learning, Artificial Intelligence, Natural Language Processing, NumPy, Pandas, Scikit-learn, Matplotlib, NLTK, SciPy, Keras, XGBoost, Seaborn, Statistical Analysis, Data Mining, Data Visualization
LLMOps & MLOps: Docker, Jenkins, Kubernetes, FastAPI, SonarQube, MLflow, Comet, TensorBoard, DVC (Data Version Control), Gradio, Streamlit, Flask, Postman, Swagger UI, Render, Modal
Cloud Platforms: Google Cloud Platform (GCP), Amazon Web Services (AWS)
Tools & Environments: Git/GitHub, Google Colab, Jupyter Notebook, Kaggle Notebook, Visual Studio Code, Cursor, Ubuntu

ACHIEVEMENTS
Secured 2nd rank overall (School) in Class X (1st rank among boys) out of approximately 300 students.
Scored 95.59 percentile in English and 91.14 percentile in General Test in CUET (UG) 2023 .
